1 Editorial

3 Note by the Co-Editor-in-Chief

5 Report on the Meeting of the International Nuclear Society

TRACK FORMATION, DETECTORS

H. Afarideh, P. Hatami and A. A. Hosseini — 9 Low energy protons and deuterons track registration in CN85 SSNT detector

S. Ahmad and J. Stejny — 11 Polymerisation, structure and track recording properties of CR-39

G. Andrássy — 17 Connections of the model of low-energy excitations with characteristics of the polymer material and irradiation and etching conditions

F. Ansari, Matiullah, Y. A. Arshad, E. U. Khan and A. Majeed — 23 Sunlight effect on sensitivity and performance of the CR-39 detector

P. Yu. Apel and O. L. Orelovich — 25 Etching of submicron pores in thin polypropylene films irradiated with heavy ions

P. Yu. Apel — 29 Conductometric studies of multiply charged ion track structure in various polymers

A. Barbu, A. Dunlop, D. Lesueur, R. S. Averback, R. Spohr and J. Vetter — 35 First transmission electron microscopy observation of latent tracks in a metallic compound

L. T. Chadderton and S. Ghosh — 41 Nuclear tracks and analogue Fermi surfaces

M. Danziger — 55 Description of the universal vitreous behaviour of solids with low-energy excitations and its application to the processes in polymer materials irradiated with heavy ions

S. A. Durrani — 61 The effect of irradiation temperature on the response of track recording crystalline and polymeric media: a brief review

K. K. Dwivedi — 71 Range and energy-loss of heavy ions by a nuclear track technique

S. Ghosh, J. Raju, P. P. Choubey and K. K. Dwivedi — 77 Characterization of overhead projector transparency as heavy ion detector

K. O. Groeneveld — 79 Electronic energy deposition mechanisms

C. Houpert, F. Studer, H. Pascard, Jin YunFan and M. Toulemonde — 85 Influence of the substrate temperature on the latent track damage cross section in magnetic insulators

S. Klaumünzer — 91 Plastic deformation of amorphous solids by track overlap

T. Kobayashi, M. Fujii and J. Nishimura — 97 Sensitivity and charge resolution of screen type X-ray films

R. Mazzei and O. A. Bernaola — 101 Evidence for a dynamic process in track formation?

V. P. Pautov — 105 On the development of experimental technology for manufacturing the cellulose nitrate detector (CND)

F. M. Russell — 109 Decorated track recording mechanisms in muscovite mica

E. Savvidis, E. Anthaki, G. Parissoglou, M. Zamani and St. Charalambous — 115 Effects of thermal treatment on alpha registration on CN-85 and CR-39 detectors

A. Schulz, G. Siegmon and W. Enge — 117 Diallylterephtalat: a new plastic nuclear track detector?

S. Singh, L. Singh, J. Singh and H. S. Virk — 121 — Heavy ion radiation damage annealing in garnet crystal

F. Spurný — 127 — Response of some solid state nuclear track detectors to protons with energies from 0.01 to 10 GeV

TRACK DEVELOPMENT

M. S. Abdel-Wahab, H. M. Eissa, E. H. El-Adl, N. El-Enany, S. El-Fiki and M. A. El-Feky — 131 — High energy charged particle registration in CR-39 polycarbonate detector

F. Abu-Jarad, M. A. Islam, I. Abu-Abdoun and M. A. Khan — 135 — Ultraviolet and laser irradiation effects on various batches of CR-39

F. Ansari, Matiullah, N. A. Javaid, E. U. Khan and M. Fujii — 139 — Etching characteristics and sensitivities of various commercially available CR-39 and SR-86 detectors

O. A. Bernaola and R. Mazzei — 143 — Inside and outside the activated region of tracks

V. M. Castaño and G. Espinosa — 149 — High voltage effects in SSNTD materials and its consequences on the fractality

I. Csige, I. Hunyadi and J. Charvát — 151 — Environmental effects on induction time and sensitivity of different types of CR-39

B. Dörschel, A. Guhr, M. Mansy, P. Schmidt and G. Streubel — 155 — Proton detection properties of CR-39 made in GDR

W. Enge, U. Leinemann, Ch. de Vries, R. Beaujean and G. Siegmon — 161 — The submicroscopic etching process in heavy ion tracks

M. Fromm, F. Membrey, A. Chambaudet and R. Saouli — 163 — Proton and alpha track profiles in CR39 during etching and their implications on track etching models

M. Fromm, F. Membrey, A. Chambaudet, R. Saouli and A. El-Rahamany — 169 — A study of CR39 bulk etch properties under various temperature and concentration conditions to modelize the dissolution rate

M. Fujii, R. Yokota, Y. Atarashi and H. Hasegawa — 171 — Etching characteristics of the new polymeric track detector SR-86

J. C. Grasso, G. Saint Martin and O. A. Bernaola — 177 — Computational code for track etch profile determination

N. A. Karamdoust and S. A. Durrani — 179 — Effect of registration temperature on the response of CR-39 to alpha particles and fission fragments

S. L. Koul, L. T. Chadderton and D. W. Fink — 185 — Chemical etching of fission fragment tracks in SiO_2

H. B. Lück — 189 — Solvent-induced sensitization of particle tracks in polyester

K. Ogura — 197 — Effects of pre-soaking on characteristics of CR-39

F. Petersen, G. Siegmon and W. Enge — 203 — Separation of the etching and measuring process in electrolytical measurements in heavy ion tracks

E. Piesch, S. A. R. Al Najjar and K. Józefowicz — 205 — The two-step electrochemical etching technique applied for polycarbonate track etched detectors

E. Piesch, B. Burgkhardt and D. Sauer — 211 — Electrochemical etching of CR-39 and Makrofol DE track detectors: investigation of parameters affecting the overall uncertainty of measurement

M. Sohrabi, L. Fozoonmayeh and M. Khoshnoodi — 215 — Advances on the new dyed ECE track (DYECET) method in polymeric dosimeters

R. J. Tanner, D. T. Bartlett, S. M. Williams, J. D. Steele and S. F. Dean — 217 — A two frequency electrochemical etch for routine processing of neutron dosemeters at the NRPB?

L. Tommasino, G. Torri and M. Notaro — 223 — Unique characteristics of thin film electrochemical etching

K. Turek, J. Bednář, G. Dajkó and F. Spurný — 227 — Study of parameters influencing the internal heating effect during electrochemical etching at room temperature

TRACK OBSERVATION

F. Abu-Jarad, M. A. Islam and A. Que — 233 — Usage of an interactive image analysis system for studying various parameters of etched tracks in CR-39 and Makrofol E

M. Balcazar, M. E. Camacho, L. Tavera and C. Andrade — 239 — Automatic α-spot-diameter measurements of large ECE CR39 detectors

J. M. Bordy, R. Medioni and G. Portal — 241 — Spectrophotometric measurement of track density in CR39 for high neutron dose determinations

J. M. Bordy and R. Medioni — 245 — Automatic counting image analysing and background reduction in electrochemically etched LR115

A. Chambaudet, F. Berger, D. Klein, D. Fellmann and R. Barillon — 247 — Development of an automatic image scanner for nuclear track analysis

A. Dragu — 249 — A fast, low cost LR-115 hole counter

D. Jonathal, R. Beaujean and W. Enge — 251 — The Kiel semiautomatic computer controlled measuring system for nuclear track detectors

M. Rebetez, B. Zoppis, A. Rebrab, P. Grillon, E. Gentina and A. Chambaudet — 255 — ATOM: a semiautomatic measuring system for the analysis of fission track characteristics in anisotropic minerals

G. Rusch, E. Winkel, A. Noll and W. Heinrich — 261 — The Siegen automatic measuring system for track detectors: new developments

L. M. Soroko — 267 — Meso-optical Fourier transform microscope as a new measurement device

S. Viques, G. Espinosa and V. M. Castaño — 271 — Image processing analysis of chemical tracks

RADON MEASUREMENTS

F. Abu-Jarad — 275 — Detection of ^{210}Po by CR-39 from filter papers used in 1984 for measuring radon daughters in a room

S. M. Ahmad, Z. Hussain and F. Mansoor — 277 — Radon measurements in and around a radiation research laboratory

C. Baixeras, I. García, F. Fernández, C. Domingo, A. Vidal-Quadras and E. Piesch — 279 — Indoor radon concentration measurements in some Spanish houses and dwellings with plastic nuclear track detectors

M. Balcazar, E. Santoyo, E. Gonzalez and D. Gonzalez — 283 — Radon measurements in heat-producing geothermal wells

M. Balcazar and A. Chavez — 289 — Evidence of radon build up in utilities service conduits

R. Barillon, D. Klein, A. Chambaudet, F. Membrey and M. Fromm — 291 — Additional uses of polymeric nuclear track detectors (CR 39 and LR 115) for measuring radon emanation

M. Beozzo, E. Bottazzi, P. Calligola, L. Degli Esposti, M. Folesani, J. Frassinetti, G. Giacomelli, L. Lembo, G. Maltoni, F. Massera, F. Nicoli, B. Pal, L. Patrizii, B. Poli, F. Predieri, M. Spagnoli, P. Serra, G. P. Sini, M. Spurio and V. Togo — 297 — Measurement of indoor radon levels in the Bologna metropolitan area

D. E. Cherouati, M. T. Chalal and S. Djeffal — 299 — Investigation of radon emanation along a seismic fault

G. Espinosa, J. I. Golzarri and A. Cortes — 305 — Radon measurements of groundwater in Mexico

G. Espinosa, V. M. Castaño, J. I. Golzarri and R. Gammage — 307 — Permeability of some materials to radon

M. Gallardo, R. Jimenez, L. Loria, M. Monnin, J. L. Seidel and J. P. Morin — 309 — Assessment of the effect of environmental factors on radon concentration in soils

J. C. Hadler N., P. J. Iunes, A. M. Osorio A. and S. R. Paulo — 313 — Relationship between track size and energy for alpha particles in CR-39

J. Hakl, I. Hunyadi and M. Tóth-Szilágyi	319	Radon permeability of foils measured by SSNTD technique (non-equilibrium approach)
I. Hunyadi, J. Hakl, L. Lénárt, G. Géczy and I. Csige	321	Regular subsurface radon measurements in Hungarian karstic regions
J. Ishankuliev, T. Ashirov and S. P. Tretyakova	327	An investigation of radon temporal variations in the subsoil atmosphere in Turkmenia using dielectric detectors
J. Ishankuliev and S. P. Tretyakova	329	Radon measurements using SSNTD in the region of oil and gas deposits of West Turkmenistan
G. Jönsson and R. Hellborg	333	Exposure of Pershore CR39 and Kodak LR115 films to helium ions
G. Jönsson	335	Solid state nuclear track detectors in radon measurements indoors and in the soil
N. A. Karamdoust and S. A. Durrani	339	Determination of radon emanation power of fly ash produced in coal-combustion power stations
M. A. Kenawy and A. A. Morsy	343	Measurements of environmental radon-222 concentration in indoor and outdoors in Egypt
M. A. Kenawy and A. A. Morsy	347	Radon measurements in the interior of the great pyramid
H. A. Khan, M. Tufail and I. E. Qureshi	351	Migration and distribution of radon/thoron and their daughters in tube type dosimeters of different lengths
H. A. Khan	353	Radon: a friend or a foe?
D. Klein, A. Chambaudet, Y. Cauchois, R. Barillon and L. Drezet	363	Developing measuring technique in radioprotection for tracking radon 222 "*in situ*"
T. Kleis, W. Enge and H. Woith	365	Plastic detectors for radon monitoring in earthquake prediction
R. H. Mahat, Y. M. Amin, T. Prabakaran and P. Sivasubramaniam	367	Soil radon dosimeter for tropical region
R. H. Mahat, Y. M. Amin and B. Ralphie	369	Preliminary results on polyethylene-sealed SSNTD radon dosemeter
Matiullah, K. Kudo, A. Majeed and M. Fujii	371	Radon—a measure of living standard
M. M. Monnin and J. L. Seidel	375	Radon and geophysics: recent advances
A. A. Qureshi, H. A. Khan, E. H. Jafri, M. Tufail and Matiullah	383	Radon signals for geological explorations
I. E. Qureshi, M. Tufail, H. Saleem and H. A. Khan	385	Theory of passive measurements of radon daughters in the tube type dosimeters
R. C. Ramola, M. Singh, S. Singh and H. S. Virk	389	Laboratory studies on the behaviour of radon diffusion through soil
A. Rawat, P. J. Jojo, A. J. Khan, R. K. Tyagi and R. Prasad	391	Radon exhalation rate in building materials
O. Sarenio and A. Guhr	395	A passive individual dosemeter for integrating measurements of the radon daughter product contents in air
N. Segovia, S. De La Cruz-Reyna, M. Mena, J. L. Seidel and M. Monnin	401	Radon-222 as an indicator of geothermal reservoirs behaviour
N. Segovia, P. Peña and E. Tamez	405	Radon survey in Mexico City
N. Segovia	409	Radon and volcanic activity: recent advances
J. Singh, L. Singh, S. Singh and H. S. Virk	415	Seasonal variation study of radon pollution at radioactive sites
M. Singh, R. C. Ramola, B. Singh, S. Singh and H. S. Virk	417	Subsurface soil gas radon changes associated with earthquakes

M. Sohrabi and M. Sadeghi 421 Efficient detection and spectrometry of alphas from radon daughters in polycarbonate

T. Šutej, M. Križman and R. Ilić 423 A new technique for radon measurement based on a combination of a track-etch detector and activated charcoal

T. Šutej and R. Ilić 425 Plateout determination of radon decay products by autoradiography

M. Tufail, S. M. Mirza, M. K. Chughtai, N. Ahmad and H. A. Khan 427 Preliminary measurements of exhalation rates and diffusion coefficients for radon in cements

M. Tufail, M. Amin, W. Akhtar, H. A. Khan, A. A. Qureshi and S. Manzoor 429 Radon concentration in some houses of Islamabad and Rawalpindi, Pakistan

I. B. Vorobjev, A. S. Krivokhatskiy, E. M. Krisyuk, V. A. Nikolaev, V. P. Pautov and M. V. Terent'ev 431 Structure and application of equipment assembly for measurement of radon volume activity in houses and soils

NEUTRON MEASUREMENTS

M. S. Abdel-Wahab, N. El-Enany, M. A. Sharaf, S. El-Fiki and M. A. El-Feky 435 Comparative study of depth dose distribution of fast neutrons using solid state nuclear track detectors

W. G. Alberts, M. Luszik-Bhadra, E. Piesch and M. Vilgis 437 Fast neutron dosimetry with CR-39: study of various materials using electrochemical etching

D. Azimi-Garakani, M. Boschung and C. Wernli 443 Track-size distribution of electrochemically etched CR-39

D. Azimi-Garakani and C. Wernli 445 Response and background study of various PADC materials

D. T. Bartlett, R. J. Tanner, J. D. Steele, S. M. Williams and P. J. Gilvin 449 The energy and angle dependence of response in terms of the ICRU quantities of the new design of NRPB neutron personal dosemeter

G. Bigazzi, J. C. Hadler N., P. J. Iunes and A. M. Osorio A. 451 Muscovite SSNTD: detection efficiency for fission fragments

W. Birkholz, C. Winkler and H. Baumbach 453 Neutron sensitivity of CR-39 SSNTD

S. Djeffal and Z. Lounis 457 Progress towards the development of a CR-39 fast neutron personal dosemeter

A. Dragu 461 Absolute measurement of thermal and fast neutron fluence with LR-115

H. M. Eissa, M. S. Abdel-Wahab, N. El-Enany, S. El-Fiki and M. A. El-Feky 465 Depth dose distribution for ^{252}Cf source using solid state detectors

F. Fernández, C. Domingo, C. Baixeras, E. Luguera, M. Zamani and M. Debeauvais 467 Fast neutron dosimetry with CR-39 using electrochemical etching

P. J. Gilvin, J. D. Steele, R. J. Tanner and D. T. Bartlett 471 Re-assessment of PADC neutron dosemeter results

L. Lakosi, J. Sáfár, L. Fülöp and I. Pavlicsek 475 Experiences with bubble detectors in monitoring neutron emission from spent reactor fuel

B. Lommler, E. Pitt, A. Scharmann and R. Simmer 479 Accidental fast neutron dosimetry by means of plastic identity cards

M. Luszik-Bhadra, W. G. Alberts, E. Dietz and S. Guldbakke 485 A track-etch neutron dosemeter with flat response and spectrometric properties

A. Majeed and S. A. Durrani 489 High-energy neutron spectrum measurements using electrochemically etched CR-39 detectors with radiators and degraders

L. Makovicka, B. Barelaud, J. L. Decossas and J. C. Vareille 495 Proposal of neutron dosemeter based on a differential structure

Matiullah, D. S. Wijaya, M. A. Berzonis, H. Bondars, A. A. Lapenas, K. Kudo, A. Majeed and S. A. Durrani 499 Neutron spectrum unfolding—Part I: theoretical

MATIULLAH, D. S. WIJAYA, A. A. LAPENAS, M. A. BERZONIS, H. BONDARS, K. KUDO, A. MAJEED and S. A. DURRANI — 501 Neutron spectrum unfolding—Part II: experimental

MATIULLAH, K. KUDO, K. M. BUKHARI and H. A. KHAN — 503 The response of a CR-39-based single element neutron dosimeter on a tissue-equivalent phantom for thermal to fast neutrons

MATIULLAH, K. KUDO, S. KHAN and H. A. KHAN — 505 Fast neutron spectrometry with electrochemically etched CR-39 detectors

L. MEDVECZKY, J. HAKL, A. FENYVESI and T. MOLNÁR — 507 Fast neutron radiation field measurements in a water phantom

J. PÁLFALVI — 511 Experiences with CR-39 SSNTD in monitoring neutrons emitted from spent reactor fuel

E. PITT, A SCHARMANN and R. SIMMER — 517 Model calculations for the fast neutron response of a CR-39 detector covered with a radiator

F. H. RUDDY — 521 Advances in high fluence solid state track recorder neutron dosimetry

E. SAVVIDIS, M. ZAMANI, D. SAMPSONIDIS and ST. CHARALAMBOUS — 527 Fast neutron detection using (n–p), (n–α) converter

H. SCHRAUBE — 531 Neutron response of etched track detectors in the light of a multilaboratory experiment

M. SOHRABI and M. KATOUZI — 537 Design characteristics of a three-component AEOI Neutriran Albedo Neutron Personnel Dosimeter

I. B. VOROBJEV, V. A NIKOLAEV, V. I. YUREVICH and R. M. YAKOVLEV — 541 Extension of the threshold track detector method for the neutron high energy range

NUCLEAR PHYSICS

J. C. ADLOFF, V. S. BUTSEV, H. H. CUI, M. DEBEAUVAIS, F. FERNÁNDEZ, Y. H. GUO, S. JOKIĆ, M. I. KRIVOPUSTOV, B. A. KULAKOV, J. RALAROSY and M. ZAMANI — 547 Total reaction cross sections at relativistic energies

H. AFARIDEH, A. A. HOSSEINI and S. A. DURRANI — 553 Angular distribution of fragments from the fission of ^{238}U and ^{232}Th induced by neutrons in the energy range 1–18 MeV

R. ANTANASIJEVIĆ, J. VUKOVIĆ, S. POPOVIĆ, M. POPOVIĆ, J. PURIĆ and M. ĆUK — 555 Detection of light charged particles from plasma focus by CR-39

B. A. ARBUZOV, H. BARTH, H. BAUMBACH, R. BRANDT, V. S. BUTSEV, H. H. CUI, E. GANSSAUGE, B. GRABEŽ, S. L. GUO, G. HAASE, M. HECK, H. A. KHAN, M. I. KRIVOPUSTOV, B. A. KULAKOV, E. J. LANGROCK, S. MANZOOR, F. PILLE, I. E. QURESHI, M. ROMMEL and M. I. SHAZAD — 557 On the use of SSNTD in relativistic heavy ion physics and the study of open questions

G. BARONI, A. M. CECCHETTI, S. DI LIBERTO, M. A. MAZZONI, F. MEDDI, G. ROSA, C. SGARBI and T. VIRGILI — 569 Interactions of 200 × A GeV ^{16}O and ^{32}S studied by emulsion and CR39 in hybrid experiments

A. BHATTACHARYYA, A. SAXENA, J. RAJU, S. GHOSH and K. K. DWIVEDI — 577 Investigations on fission fragment tracks in ZnP-glass and SR-86 detectors

R. BONETTI, C. CHIESA, A. GUGLIELMETTI, C. MIGLIORINO, A. CESANA and M. TERRANI — 579 Measurement of exotic decay half lives with track detectors

J. CHARVÁT and F. SPURNÝ — 585 The (D–D) fusion reaction products identification using the CR 39 track detector

H. H. CUI, H. BARTH, R. BRANDT, V. S. BUTSEV, G. HAASE, M. HECK, M. I. KRIVOPUSTOV, B. A. KULAKOV, E.-J. LANGROCK, F. PILLE and M. ROMMEL — 591 Study of the angular distribution of heavy fragments produced in the interaction of 58 GeV ^{16}O ions with a 1 cm thick Cu-target

K. K. Dwivedi, S. Ghosh and J. Raju — 597 — Measurement of target thickness by a nuclear track technique

E. Ganssauge — 599 — Contribution of the EMU-01-collaboration to the research for a quark gluon plasma (QGP)

B. Grabež and D. L. Lazić — 609 — Application of CR-39 detector to investigation of intermediate mass fragment production in reaction $^{40}Ar + ^{208}Pb$ at E/A = 19.6 MeV/u

S.-L. Guo, X. H. Hao, Y.-L. Wang, G.-R. Shen, H. Barth, H. Baumbach, R. Brandt, V. S. Butsev, G. Haase, M. Heck, M. I. Krivopustov, B. A. Kulakov, E. J. Langrock and F. Pille — 615 — Energy and fluence determination of fast neutrons from 44 GeV $^{12}C + Cu$ interactions by CR-39 detector stack

R. Ilić and J. Rant — 619 — The search for cold nuclear fusion with track-etch and bubble damage detectors

N. A. Karamdoust, A. Majeed and S. A. Durrani — 627 — Cold fusion: radon contribution to neutron production?

E. U. Khan, A. Waheed, R. Tahseen, I. E. Qureshi, H. A. Khan, Matiullah and R. Brandt — 629 — Study of heavy ion ranges in mica

E. U. Khan, J. J. Baluch, R. Tahseen, F. N. Khattak, F. U. Khan, S. H. Qureshi, A. Waheed, F. Masud, I. E. Qureshi, H. A. Khan, Z. Arif, M. S. Zafar, M. Debeauvais and R. Brandt — 631 — Heavy ion interaction of 14 MeV/N Pb projectiles with heavy targets using different track detectors

H. A. Khan, N. A. Khan and R. J. Peterson — 637 — Reaction parameters in the interaction of 80 MeV pions with some light and heavy targets

H. A. Khan, I. E. Qureshi, S. Manzoor and Matiullah — 639 — Interaction of 86 MeV/u-^{18}O and 107 MeV/u-^{12}C ions with different targets

L. Patrizii for the MACRO collaboration — 641 — Improvements in the CR39 polymer for the MACRO experiment at the Gran Sasso laboratory

I. E. Qureshi and H. A. Khan — 647 — Energy dependence of heavy ion reactions: systematics

J. Ralarosy, M. Debeauvais, J. C. Adloff, M. Zamani, F. Fernández, S. Jokić and Z. Todorović — 651 — Interpretation of the 3-pronged events from the $^{238}U + Au$ reaction registered within CR 39 solid state nuclear track detectors

G. Singh, R. Kaur and H. S. Virk — 655 — Track etching studies in phosphate glass detectors

K. D. Tolstov — 657 — Some peculiarities of relativistic nucleus collisions

S. P. Tretyakova — 665 — Detection and identification of heavy ion-induced nuclear reaction products

S. P. Tretyakova — 667 — Observation of nuclear clusters in the spontaneous fission of heavy nuclei

SPACE RESEARCH

C. Baixeras, C. Domingo and F. Fernández — 675 — Ultra heavy ion studies with plastic nuclear track detectors. Application to cosmic rays

R. Beaujean, J. Kopp and W. Enge — 681 — Measurements of high-LET-spectra on Biocosmos 9

R. Beaujean, D. Jonathal and W. Enge — 685 — Heavy ion measurement on LDEF

A. Hesse, B. S. Acharya, U. Heinbach, W. Heinrich, M. Henkel, B. Luzietti, C. Koch, M. Simon, V. K. Balasubrahmanyan, L. M. Barbier, E. R. Christian, J. A. Esposito, J. F. Ormes and R. E. Streitmatter — 689 — An isotope experiment using Cherenkov range technique

N. T. Kashukeev, V. P. Perelygin and R. I. Petrova — 695 — Annealing behaviour of the "fresh" and "fossil" fission fragment tracks in phosphate crystals from meteorites

A. M. Marenny, R. A. Nymmik, I. Hunyadi, I. Csige, F. Spurný, J. Charvát and G. P. Guertzen — 697 — Low-energy heavy ions of cosmic rays measured on Cosmos-2044 biosatellite

V. P. Perelygin, S. G. Stetsenko, R. Brandt, P. Vater, R. Dersch, H. J. Crawford, T. J. M. Symons and C. Perron — 703 — On identification of the galactic cosmic-ray nuclear tracks due to Th–U in olivine crystals from meteorites

K. Thiel, J. P. Bradley and R. Spohr — 709 — Investigation of solar flare tracks in IDPs: some recent results

GEOSCIENCE, DATING

S.-L. Guo, S.-S. Liu, S.-F. Sun, F. Zhang, S.-H. Zhou, X.-H. Hao, R.-Y. Hu, W. Meng, P.-F. Zhang and J.-F. Liu — 719 — Age and duration of Peking Man site by fission track method

V. P. Perelygin, R. I. Petrova, S. G. Stetsenko, Kh. Murtazaev and N. T. Kashukeev — 725 — On fission track dating of the terrestrial apatite crystals

LIFE SCIENCE, RADIOGRAPHY

A. B. Akopova, N. V. Magradze, L. V. Melkumian, A. A. Moiseenko, K. M. Ovnanian, Sh. B. Rshtuni, V. E. Dudkin and Yu. V. Potapov — 729 — Assessment of radiation environment on board COSMOS-2044 biosatellite by the nuclear emulsion method

A. B. Akopova, N. V. Magradza, A. A. Moiseenko, T. S. Chalabian, N. V. Viktorova and E. K. Garger — 733 — Autoradiographic investigation of radionuclide alpha-activity in soil and plant samples from Chernobyl zone

B. Baican, E. Schopper, Th. Wendnagel, J. U. Schott and C. Heilman — 739 — Experiment "Seeds" on Biokosmos 9, physical part

R. Benderac, D. Ristic, R. Antanasijević and J. Vuković — 745 — Measurement of gross alpha-activity in some thermal water sources in Yugoslavia by SSNTDs

I. G. Berzina, E. B. Gusev and V. A. Ivanov — 747 — Some aspects of solid track detector usage in ecological research

K. Freyer, K. Dietze, S. Weisse and G. Kummer — 751 — Autoradiographic measurement of low concentrations of alpha-active nuclides using CR-39 track detectors

K. Freyer, H. C. Treutler and S. Weisse — 755 — Quantitative analysis of boron in solids by neutron induced autoradiography

E. U. Khan, M. Tufail, R. Tahseen, N. A. Din, Matiullah, F. Ansari, H. X. Hao, Y. L. Wang, S. L. Guo and A. Waheed — 761 — Environmental radioactivity in Dera Ismail Khan and its adjacent area—Pakistan

E. I. Knizhnik, S. G. Stetsenko and V. V. Tokarevsky — 765 — Estimation of soil surface alpha activity and alpha contamination by polymer track detectors

Zs. Kocsis and T. Lengyel — 769 — Assessment of the radioactivity of environmental samples by SSNTD technique

P. Mahawatte and R. Hewamanna — 775 — Absolute alpha activity measurements of some plants growing in monazite bearing soils in Sri Lanka

A. Majeed and S. A. Durrani — 781 — Some dosimetry related investigations on a high-energy neutron therapy beam, using SSNTDs

C. S. Su — 785 — Determination of trace quantity of alpha emitter by isotope dilution method using solid state nuclear track detector

A. Waheed, S. Manzoor, I. Urlep, R. Ilić, R. Cherubini, G. Moschini, P. Schiavon and H. A. Khan — 789 — Proton radiographic characteristics of thin CR-39 detector

C. J. Zeissler — 793 — Etched topography in nuclear track detectors and effect on quantitation related to sample composition

FILTERS, MATERIAL SCIENCE AND OTHER APPLICATIONS

H. Afarideh, M. Lamehi and S. A. Durrani — 801 — Beam profile measurement of particles produced by 3 MeV Van de Graaff accelerator

J. Auleytner, J. Bak-Misiuk, Z. Furmanik, M. Toulemonde and J. Vetter — 803 — X-ray study of Si crystals irradiated by fast uranium ions

H.-H. Cui, Q.-Y. Zhang and S.-C. Wang — 807 — The applications of nuclear track microfilters

S.-L. Guo, X.-H. Hao, J.-G. Lin, S.-Q. Wang, Y.-L. Wang, Z.-J. Fan, C.-D. Zhao, R. Brandt, P. Vater and M. Ganz — 809 — Manipulation and effectiveness of bacteria filtration with particle track microfilters

S.-L. Guo, Y.-L. Wang, X.-H. Hao, T.-C. Zhu, H. A. Khan, G. Hussain, R. Brandt, P. Vater and M. Ganz — 813 — Nuclear track membrane—a miniature element for determination of solute concentration in various solutions

S.-L. Guo, R. Brandt and P. Vater — 815 — Some basic rules of nuclear track membranes on liquid phase media

E. U. Khan, S. H. Qureshi, Alam Sher, W. Ahmed, Matiullah and F. D. Durrani — 817 — Kapton particle track micro filters in environmental studies

E. I. Knizhnik and A. D. Onisko — 819 — Quasi-track technological dosimetry of narrow electron beams by means of transparent polymers

S. L. Koul, L. T. Chadderton, D. W. Fink and S. A. Cruz — 825 — On the tailoring of polymers by radiation

C.-D. Zhao, P. Vater and R. Brandt — 829 — Further studies on the production of PVDF nuclear track microfilters

GENERAL PAPERS

D. Azimi-Garakani — 835 — Results of the International Survey on Particle Tracks in Solids

G. Espinosa — 843 — Past, present and future of materials, methodology and instrumentation in particle tracks in solids

R. L. Fleischer — 847 — Where are nuclear tracks leading? Directions in track studies

M. Sohrabi — 855 — Advances on research, development and applications of SSNTDs in radiation protection at AEOI

H. S. Virk — 861 — Status and perspectives of track research at Guru Nanak Dev University, Amritsar

HEAVY ION MATERIALS RESEARCH

N. Angert — 871 — Ion beams at GSI

C. Bieth and the S.A.I.F. Group — 875 — Perspectives applications of tracks at GANIL

J. Dethlefs, G. Siegmon and W. Enge — 881 — Etching processes in CR-39 and Lexan. Individual tracks as closed reaction vessels

H. Gärtner, K. Thoma, H. Volkmann, Th. Wieder, A. Schmitt, D. M. Rück and B. H. Wolf — 885 — High-energy implantation of Kr^+ into Ti

O. Geschke, H. Röcher, A. Noll, J. Dreute, B. Wiegel, S. Hirzebruch, W. Heinrich, R. Harboe Sorensen, L. Adams and J. Vetter — 891 — Study of radiation effects of heavy ions in microelectronic devices

R. Guillet, J. Vetter, D. Koutsouris, Y. Beuzard and M. Boynard — 895 — Individual red blood cell (RBC) transit analysis through sized micropores of oligopore filters: application to RBC subpopulations

M. Hagiwara — 899 — Radiation chemistry research at JAERI. Present and future possibilities

M. Hartick, G. Müller, U. Imkeller, E. Kankeleit, B. Keck, G. Klingelhöfer, S. Laubach, M. Menningen, P. Schwalbach, R. Sielemann and B. Stahl — 903 — Implantation of ^{57}Fe in silicon—investigated by Mößbauer spectroscopy

S. Klaumünzer, W. Petry and G. Schumacher — 907 — A search for particle tracks in the metallic glass $Pd_{80}Si_{20}$

G. Kraft, W. Becher, K. Blasche, D. Böhne, B. Fischer, G. Gademann, H. Geissel, Th. Haberer, J. Klabunde, W. Kraft-Weyrather, B. Langenbeck, G. Münzenberg, S. Ritter, W. Rösch, D. Schardt, H. Stelzer and Th. Schwab	911	The heavy ion therapy project at GSI
